FLIGHT RESERVATION SYSTEM —

This Flight Reservation System project aims to develop a system to automate the working of a flight reservation system. It will provide the user the ability to book flights, cancel flights, search for flights, and manage the flights. The system will also provide an administrative module for the airline sta to manage the system. The system will be built using Java programming language. The user interface will be designed using HTML and CSS. The system will provide secure authentication and authorization for the users and administrators.

PROJECT

MINI PROJECT ON WHO WILL BE MILLIONAIRE —

This project introduces a version of internationally popular television game show who will be a millionaire? represents a virtual player for the quiz game with a few limitations And my role in this project was to write user defined functions that might helps the player to engage with the game.
